WORK EXPERIENCE

Backend Developer Intern

Otomashen Pvt. Ltd.

Gurgaon

February 2026 - Present

- Working as a key backend developer within the ATS (Applicant Tracking System) team.
- Designing, developing, and maintaining scalable REST APIs to streamline recruitment and data workflows.

Software Development Intern

Empower Logics

Gurgaon

July 2025 - January 2026

- Developing backend services using .NET Web API and building responsive UIs with Angular.
- Assisting with integrating AI-driven features and managing Windows Services for application uptime.

Data Analyst Intern

Autofit Pvt. Ltd.

Gurgaon

June 2024 - August 2024

- Performed in-depth data analysis using MySQL & Power BI to inform business decisions.
- Supported the IT Manager with database management and system troubleshooting.

PROJECTS

Embrace Well - Mental Health Companion

- Developed a full-stack mental health platform with Flask & a CNN model for depression detection, including peer chat rooms and psychologist appointment booking.

Ticketing System

- Created a system for users to submit tickets, which are then assigned to developers by a manager. The platform includes features to track developer performance and resolution times.

Complaint Management System

- Built a complaint management system using a web form, Azure storage, and a Power BI dashboard for real-time analytics and tracking.

Sales Prediction Model

- Built a machine learning model to forecast sales based on advertising spend and audience segmentation for marketing insights.

ACHIEVEMENTS

- Cleared GATE 2025 Examination in the first attempt.
- Awarded 80% Academic Scholarship on Tuition Fee by Bennett University.
- Secured 26th Rank in BU-SIH (Smart India Hackathon) out of 216 teams.
